PROFESSIONAL SUMMARY

2026 B.Tech CSE (AI & ML) graduate with project experience in Python, retrieval, machine learning and API integration. Seeking junior Python/backend or applied AI roles and paid internships. Open to relocation across India.

EDUCATION

B.Tech, Computer Science & Engineering (AI & ML), Lateral Entry **2023 – 2026**
Raghu Engineering College, Visakhapatnam *CGPA: 8.6*

Diploma, Mechanical Engineering **2020 – 2023**
Sanketika Polytechnic College, Visakhapatnam *CGPA: 8.5*

SKILLS

Languages:	Python, C, SQL
AI/ML Frameworks:	TensorFlow, Scikit-learn, XGBoost, Pandas, NumPy, Matplotlib, Streamlit, Groq, FAISS, Sentence Transformers, SHAP
AI/ML Concepts:	Machine Learning, Deep Learning, NLP, Generative AI, RAG, Prompt Engineering, Explainable AI (XAI), Data Science
Tools & Platforms:	Git, GitHub, Jupyter Notebook, Google Colab, VS Code, MySQL, FastAPI, Docker, HuggingFace Spaces

INTERNSHIPS & TRAINING

AI-ML Virtual Internship **Jun 2025 – Jul 2025**
Edunet Foundation (with AICTE & IBM SkillsBuild)

- Engineered predictive models using Python, Scikit-learn, and IBM Watson, streamlining data pipelines.
- Completed an income-classification project with preprocessing and model evaluation.

Machine Learning Internship **Feb 2025 – May 2025**
Talent Lad

- Architected predictive models using Scikit-Learn, Pandas, and NumPy with advanced feature engineering.
- Used cross-validation and hyperparameter tuning to evaluate predictive models.

AI-ML Virtual Internship **Apr 2024 – Jun 2024**
EduSkills — AI/ML Virtual Programme

- Designed and optimized deep learning networks using TensorFlow for end-to-end ML workflows.
- Practised model training and evaluation as part of the virtual programme.

PROJECTS

Multimodal Fake News Detection System (RAG & XAI) **[GitHub] | [Live Demo]**

- Architected a Hybrid Cloud AI system with NLP, Cloud APIs, and a RAG pipeline for live fact-checking.
- Integrated local model inference and attribution with a FastAPI backend and Docker configuration.

AI Research Assistant **[GitHub] | [Live Demo]**

- Developed a research application leveraging Groq, FAISS, and Sentence Transformers for semantic search.
- Implemented a source-support heuristic and web-search integration with a Streamlit interface.

Income Classification (XGBoost & SHAP) **[GitHub]**

- Built an ML pipeline and interactive dashboard using XGBoost and SMOTE for income prediction.
- Integrated SHAP Explainable AI to interpret model decisions and built a Streamlit dashboard.

CERTIFICATIONS

- **Generative AI Mastermind** — Outskill
- **Machine Learning using Python** — IBM / edX
- **SQL & Database Management** — SkillRack
- **Artificial Intelligence** — IBM Skills Build
- **Python Programming** — HackerRank
