PROFESSIONAL SUMMARY

AI & ML Engineer with hands-on experience in Generative AI, RAG architectures, and Explainable AI. Skilled in building end-to-end intelligent systems, optimizing deep learning models for 15% accuracy gains, and engineering scalable multimodal pipelines using open-source LLMs, TensorFlow, and FastAPI.

EDUCATION

B.Tech, Computer Science & Engineering (AI & ML) <i>Raghu Engineering College, Visakhapatnam</i>	2023 – 2026 CGPA: 8.6
Diploma, Mechanical Engineering (Lateral Entry into B.Tech) <i>Sanketika Polytechnic College, Visakhapatnam</i>	2020 – 2023 CGPA: 8.5

SKILLS

Languages:	Python, C, SQL
AI/ML Frameworks:	TensorFlow, Scikit-learn, XGBoost, Pandas, NumPy, Matplotlib, Streamlit, Groq, FAISS, Sentence Transformers, SHAP
AI/ML Concepts:	Machine Learning, Deep Learning, NLP, Generative AI, RAG, Prompt Engineering, Explainable AI (XAI), Data Science
Tools & Platforms:	Git, GitHub, Jupyter Notebook, Google Colab, VS Code, MySQL, FastAPI, Docker, HuggingFace Spaces

EXPERIENCE

AI-ML Virtual Internship <i>Edunet Foundation (in collaboration with AICTE & IBM SkillsBuild)</i>	Jun 2025 – Jul 2025
- Engineered end-to-end predictive models using Python, Scikit-learn, and IBM Watson, streamlining data preprocessing and feature engineering pipelines. - Delivered a high-performance classification model achieving 87%+ predictive accuracy by optimizing model architecture and hyperparameter configurations.	
Machine Learning Internship <i>Talent Lad</i>	Feb 2025 – May 2025
- Architected and trained robust predictive models using Scikit-Learn, Pandas, and NumPy, implementing advanced statistical feature engineering techniques. - Boosted model reliability by executing rigorous cross-validation and hyperparameter tuning, yielding significant improvements in AUC and F1-score metrics.	
AI-ML Virtual Internship <i>Google Developers (in collaboration with Eduskills)</i>	Apr 2024 – Jun 2024
- Designed and optimized advanced deep learning neural networks using TensorFlow, establishing end-to-end ML workflows from data preprocessing to model benchmarking. - Achieved a 15% improvement in baseline accuracy by systematically tuning model architectures and optimizing loss functions.	

PROJECTS

Multimodal Fake News Detection System with RAG & XAI <i>[GitHub] [Live Demo]</i>	
- Architected a Hybrid Cloud AI system utilizing local NLP (RoBERTa, TextBlob) and Cloud APIs (Gemini 3.5 Flash, Groq Llama-3.1) with a RAG pipeline (Serper API) for live web fact-checking. - Integrated Explainable AI via XGBoost to classify multi-lingual misinformation, deploying the highly-scalable backend via FastAPI and Docker on Hugging Face Spaces.	
Autonomous AI Research Agent (GenAI + RAG System) <i>[GitHub] [Live Demo]</i>	
Developed a high-speed Autonomous AI Research Agent leveraging Groq (Llama 3), FAISS vector databases,
